## Old Volumes of Solids of Revolution (DISK METHODS)

Find the volume of the solid of  $y = x^2$  and  $x = 0$  and rotate it about the  $y$ -axis from  $y = 0$  to  $y = 4$ .

$$\begin{aligned} V &= \int_0^4 \pi (f(y))^2 dy = \int_0^4 \pi (\sqrt{y})^2 dy = \pi \int_0^4 y dy = \pi \left[ \frac{y^2}{2} \right]_0^4 = \pi \left[ \frac{(4)^2}{2} \right] - \left[ \frac{(0)^2}{2} \right] \\ &= \pi \left[ \frac{16}{2} \right] = 4\pi \end{aligned}$$

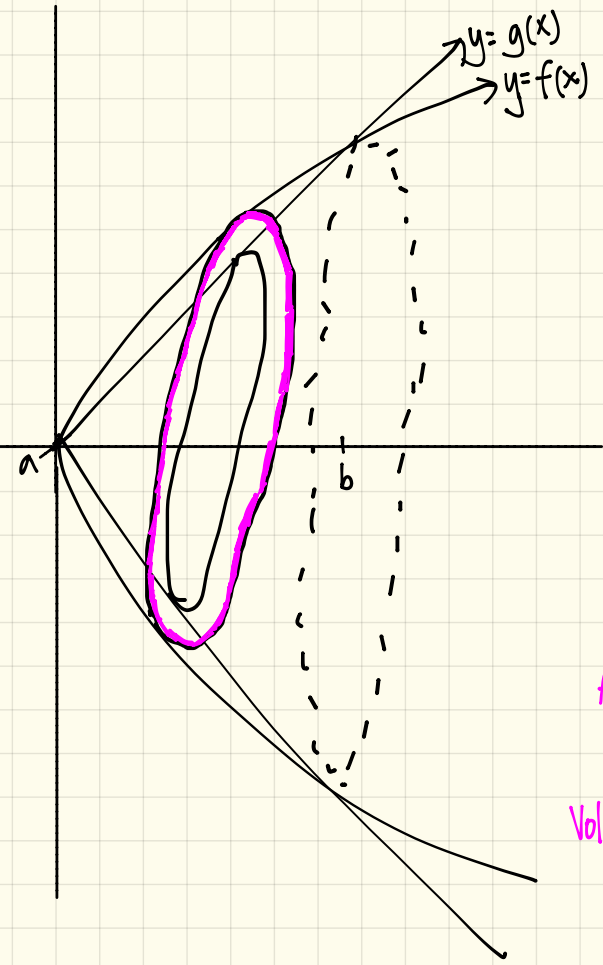

# more old... Area between curves

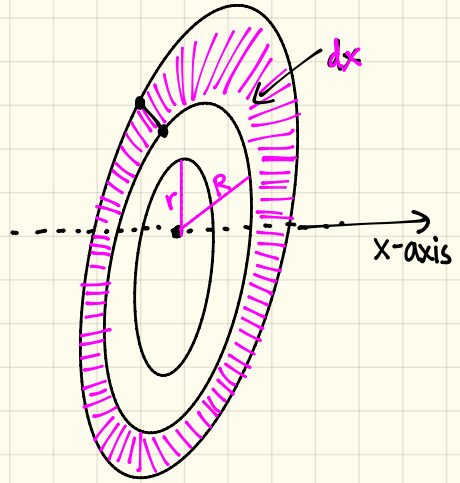

$$\begin{aligned}x^2 &= \sqrt{x} \\(x^2)^2 &= (\sqrt{x})^2 \\x^4 &= x \\x^4 - x &= 0 \\x(x^3 - 1) &= 0 \\x &= 0, 1\end{aligned}$$

$$\begin{aligned}\text{Area} &= \int_0^1 [\sqrt{x}] - [x^2] dx = \int_0^1 x^{1/2} - x^2 dx = \frac{x^{3/2}}{3/2} - \frac{x^3}{3} \\&= \left[ \frac{2}{3} x^{3/2} - \frac{x^3}{3} \right]_0^1 = \left[ \frac{2}{3} (1)^{3/2} - \frac{(1)^3}{3} \right] - \left[ \frac{2}{3} (0)^{3/2} - \frac{(0)^3}{3} \right] \\&= \frac{2}{3} - \frac{1}{3} = \left( \frac{1}{3} \right)\end{aligned}$$

Let's consider the functions  $f(x)$  and  $g(x)$ . Find the volume of revolution of the solid revolving around the x-axis.

A section:

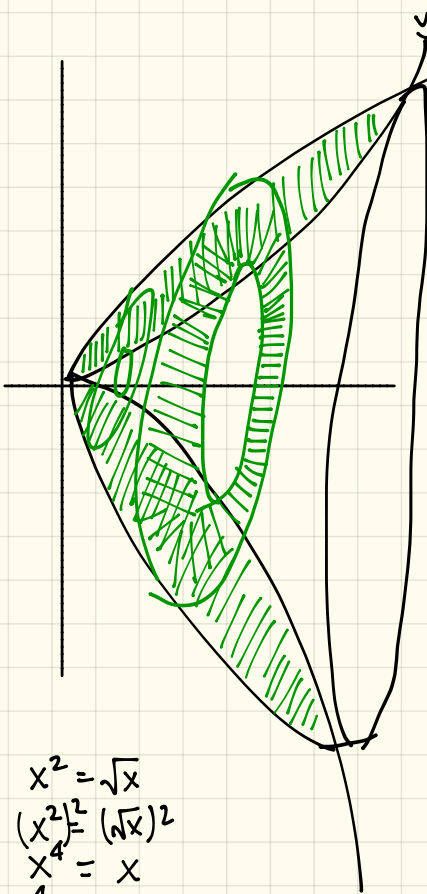

$$\begin{aligned} \text{Area} &= \pi(R^2) - \pi(r^2) \\ &= \pi(R^2 - r^2) \end{aligned}$$

$$\text{Volume} = \text{Area} * dx = \pi[R^2 - r^2] dx \quad \left. \vphantom{\text{Volume}} \right\} \text{Volume for one section}$$

$$\int_a^b \pi[R^2 - r^2] dx$$

Formula for when bounded by 2 curves (WASHER METHOD)

[Example 1] Find the volume of the solid generated about the x-axis by  $y = \sqrt{x}$  and  $y = x$ .

$$V = \int_0^1 \pi [(\sqrt{x})^2 - (x)^2] dx$$

$$= \pi \int_0^1 x - x^2 dx$$

$$= \pi \left[ \frac{x^2}{2} - \frac{x^3}{3} \right]_0^1$$

$$= \pi \left[ \left[ \frac{(1)^2}{2} - \frac{(1)^3}{3} \right] - \left[ \frac{(0)^2}{2} - \frac{(0)^3}{3} \right] \right]$$

$$= \pi \left[ \frac{1}{2} - \frac{1}{3} \right]$$

$$= \frac{\pi}{6}$$

$$x^2 = \sqrt{x}$$

$$(x^2)^2 = (\sqrt{x})^2$$

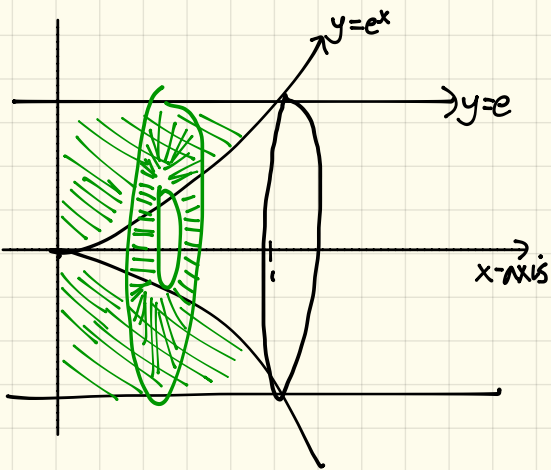

$$x^4 = x$$

$$x^4 - x = 0$$

$$x(x^3 - 1) = 0$$

$$x = 0, 1.$$

[Example 2] Find the volume of revolution bounded by  $y=e^x$ ,  $y=e$ ,  $x=0$ ,  $x=1$  & revolve about  $x$ -axis.

$$V = \int_0^1$$
